

# WFS Inbound Shipping Guide

## WFS Inbound Shipping Guide

---

### Preparing Shipments

Proper preparation of inbound WFS shipments prevents delays and ensures your inventory is received and processed quickly.

- Create an inbound shipment plan in Seller Center before shipping
- Label all items with WFS-compliant barcodes
- Follow packaging requirements for product protection
- Use approved box sizes and packing materials
- Include all required shipment documentation

### Shipping Best Practices

Optimize your inbound shipping process for efficiency and cost.

- Send inventory in regular, smaller shipments rather than large infrequent ones
- Use Walmart's preferred carriers for potentially discounted rates
- Track inbound shipments and monitor processing status in Seller Center
- Plan for 3-7 business day processing time after delivery
- Schedule shipments to maintain 60-90 days of inventory at WFS
